Ronald C. Mulford, Fire Chief

April 16, 2013 - SFD's Replaces Aging Fire Engine Fleets

New, Re-designed Fire Engines set to hit Shreveport Streets this week

Shreveport Fire Chief Craig Mulford will unveil three (3) new re-designed fire engines during a press conference tomorrow at 10:30 a.m. At an estimated savings of \$150,000 for the City of Shreveport and the Department, these fire engines sport a shorter wheel-base for better maneuverability through congested roadways and a side-mount pumper that reduces the length of the fire engine by more than two feet.

The obvious differences between the traditional fire engine and the newly designed models are the overall size and length of the fire engines. These fire engines were purchased with funds allocated by the Shreveport City Council.

Fire Engine Unveiling:

Where: Central Fire Station, 263 North Common Street

Date: Wednesday, April 17, 2013 Time: 10:30 a.m.
